

Why is the **Best Heating Oil Additive?**

The components found in the **Avalux** package are widely regarded as the “**Gold Standard**” in the industry.

- The **Avalux** base components “are the basis of the **only** long term fuel stability additive used by the U.S. Army.”
- The main stabilizer in **Avalux** is “the **only** chemistry type approved by the U.S. Navy for long term fuel stabilization.” **Avalux** “**begins to work immediately upon application.**”
- “The dispersant in **Avalux** is universally regarded as the Best available dispersant.”
- “The dosage of dispersant in **Avalux** ensures **slow release of built up sediment.**”

The highest quality active ingredients in **Avalux** reduce sludge in heating oil **early on**. Extensive field testing proved that **Avalux** can reduce fuel-related service calls by 58%.

59% of this reduction occurred in the first year and 78% was achieved in the first two years.

In addition, **Avalux** is not overly-aggressive in removing existing sludge. It **dissolves sludge gradually**, into minute particles that easily pass through the fuel delivery system and burn away. In the last eight years, scores of **Avalux** customers have experienced significant savings associated with reduced sludge-related service calls after using or switching to **Avalux** !

Advanced Distillate Technologies, LLC
Exceptional distillate performance starts here! _____

Exclusive Provider of ... 
The Proven Heating Oil Additive™
For NJ, PA, MD, DE, VA, VT, UPRY

 NOW TREATING OVER 250,000,000 Gallons of Heating Oil per year in the Northeast!
